SETUP

CONNECTIONS

Connection to a TV

CAUTION:

- Be sure to turn off the unit and equipment to be connected before connecting.
- Read through the Operation Manual for the equipment to be connected.
- Be sure that the colors of the jacks and plugs match up when connecting the cable.
- Be sure to keep the unit connection cables separate from the TV antenna cable when you install the unit, because it may cause electrical interference when you are watching television programs.

CAUTION:

- Connect the unit directly to the TV. Do not connect the unit to a VCR, then connect the VCR to the TV. Copyright protection in the VCR could distort the picture playing on the unit.

Hint

- The unit is sending each video signals simultaneously. If you connected an S-VIDEO OUT and/or a COMPONENT VIDEO OUT with the VIDEO OUT, make sure your TV's input mode is set correctly according to the connection you made.
- If you want to listen to the audio through audio equipment, connect only the S-video, component video cable or video cable to the TV.
- You will not be able to hear all of the sound being output by the unit if you use the video/audio cable (supplied) to a monaural TV that has only one audio input jack.

If your TV is compatible with 525 progressive scanning and you want to enjoy that high quality picture:

You must select the connection **Method 3** above and progressive scanning mode. To set the mode, set "PROGRESSIVE" to "ON" in the DISPLAY menu, so that the PROGRESSIVE indicator on the front panel lights on. See pages 16, 17 for more details.

- When "PROGRESSIVE" is "ON", video signals from the unit's VIDEO OUT and S-VIDEO OUT jacks will be distorted or not be output at all.

If your TV is not compatible with progressive scanning:

Use this unit in interlace mode and set "PROGRESSIVE" to "OFF" either in the DISPLAY menu or by pressing and holding **PLAY** on the front of the unit for more than 5 seconds, so that the PROGRESSIVE indicator on the front panel lights off.

RF Modulator Connection

If your TV has Antenna input jack only, it is still possible to connect this unit to your TV by using a STEREO AUDIO/VIDEO RF Modulator (commercially available).

In this case, follow the instructions below.

1. Connect the AUDIO/VIDEO output jacks of this unit to the AUDIO/VIDEO input jacks of your RF Modulator by audio and video cables.
2. The antenna input jack of your TV may have been already occupied. If so, disconnect the RF cable from your TV, and then connect the RF cable to your RF Modulator (usually marked "ANT IN").
3. Connect your RF modulator to your TV by another RF cable.
4. Set your RF modulator's channel 3/4 switch to either 3 or 4, whichever the TV channel is least used in your area. If your RF modulator has a Modulator/Antenna switch, set it according to your RF modulator's manual.
5. Turn on your TV and choose the same channel as you set the RF modulator's channel 3/4 switch to. For more details, follow the instructions supplied with the RF Modulator.

Hint

- The quality of picture may become poor if the unit is connected to an RF Modulator.

Digital Connection to Audio Equipment or MD deck without a Dolby Digital Decoder

- Audio CD
Audio CDs can be transferred digitally to other equipment such as an MD deck or DAT deck, play the disc as you would normally with the connection shown above. Audio CDs recorded in the DTS format cannot be transferred digitally or via analog.

El grabador de videocassettes podría caerse, causando serias lesiones a un niño o adulto, resultando también severamente dañado. Uselo sólo en un carro, soporte, trípode o mesa recomendados por el fabricante, o vendidos con el producto. Toda instalación del producto deberán hacerse de acuerdo a las instrucciones del fabricante, empleando los accesorios de instalación recomendados por el mismo.
- 9) La combinación de producto y carro debe ser movida con cuidado. Las detenciones bruscas, la fuerza excesiva y las superficies dispares harán que el producto y el carro se vuelquen.
- 10) Ventilación - El gabinete del producto tiene ranuras y aberturas de ventilación que garantizan el funcionamiento confiable del producto, evitando que se recaliente. Estas aberturas no deberán ser bloqueadas, nunca se debe instalar el grabador de videocassettes encima de una cama, sofá, alfombra u otra superficie similar. El grabador de videocassettes no debe ser instalado en un mueble empujable, como una repisa para libros o bastidor, a menos que se pueda garantizar una ventilación adecuada, o cuando las instrucciones del fabricante así lo especifiquen.
- 11) Alimentación - Este grabador de videocassettes sólo debe ser operado mediante el tipo de fuente de alimentación especificado en la etiqueta indicadora. Si no se usa el tipo de fuente de alimentación que tiene en su casa, consulte a su distribuidor o a la compañía de electricidad local. En el caso de grabador de videocassettes diseñados para funcionar a pilas o con otras fuentes de alimentación, consulte el manual de instrucciones respectivo.
- 12) Conexión a tierra o polarización - Este producto está equipado con una clavija polarizada de corriente alterna (una clavija que tiene una espiga más ancha que la otra). Esta clavija solamente podrá ser insertada en el tomacorriente en una sola dirección. Esta es una medida de seguridad. Si no pudiera insertar completamente la clavija en el tomacorriente, vuelva a intentarlo invirtiendo la clavija. Si aún no fuera posible insertar la clavija, tome contacto con un electricista para que repare su tomacorriente obsoleto. No modifique las características de seguridad de la clavija polarizada.
- 13) Protección del cable de alimentación - Los cables de alimentación deberán ser tendidos de manera tal que la probabilidad de que sean pisados o aplastados por otros objetos sea mínima. Preste especial atención a las clavijas de los cables, a los receptáculos, y al punto por donde salen del producto.
- 14) Tormentas eléctricas - Como medida adicional de protección durante tormentas eléctricas, o cuando el producto permanezca sin uso durante períodos prolongados de tiempo, desconéctelo del tomacorriente mural y desconecte la antena o sistema de cable. Esto evitará que el grabador de videocassettes resulte dañado por tormentas eléctricas o sobretensiones en la línea de alimentación.
- 15) Líneas de alimentación - Una antena exterior no debe ser instalada en la cercanía de líneas de alimentación aéreas ni de otros circuitos de potencial para iluminación eléctrica, o donde pueda caerse y hacer contacto con tales líneas o circuitos. Al instalar un sistema de antena exterior, entienda mucho cuidado de no tocar tales líneas o circuitos de alimentación, ya que el contacto con ellos podría ser fatal.
- 16) Sobrecarga - No sobrecargue los tomacorrientes murales ni los cables de extensión, ya que esto podría causar incendios o descargas eléctricas.
- 17) Entrada de objetos y líquidos - Nunca introduzca objetos de ningún tipo por las aberturas de este producto, ya que podría tocar peligrosos puntos de alta tensión o cortocircuitar partes, provocando incendios o descargas eléctricas. Nunca derrame ningún tipo de líquido sobre el producto.

- 19) Daños que requieran reparación - En los siguientes casos, desconecte el producto del tomacorriente mural y llame a un técnico de servicio calificado:
 - a) Cuando el cable de alimentación o la clavija estén dañados,
 - b) Si se ha derramado líquido sobre la unidad, o si algún objeto ha caído dentro del producto,
 - c) Si el producto ha sido expuesto a la lluvia o al agua,
 - d) Cuando a pesar de haber seguido las instrucciones de operación, el producto no funciona normalmente. Ajuste solamente los controles mencionados en el manual de instrucciones; el ajuste incorrecto de otros controles podrá causar daños a la unidad, la que por lo general requerirá de un prolongado trabajo de reparación (por un técnico calificado) para que sus condiciones normales de operación puedan ser restablecidas,
 - e) Si el producto se ha caído o si el gabinete se ha dañado.
